```python
from psychopy import event, core, visual, monitors

mon = monitors.Monitor('sponge', width=40, distance=57)
mon.setSizePix((1920, 1080))
win = visual.Window(
winType="pyglet",
size=(800, 600),
monitor=mon,
color=(-1,-1,-1),
units='deg',
)

mouse = event.Mouse()
mouse.clickReset()

while True:
buttons, times = mouse.getPressed(getTime=True)
print(buttons, times)
win.flip()
core.wait(.01)
```
